Fat Transfer Hubs

Toomey Syringe Fat Transfers Male and Female connections used to prepare and transfer extracted tissue for reinjection.

The Toomey transfer set allows transfer between two 60cc syringes.

A single 60cc Female transfer alone enables Toomey syringe to luer lock syringe transfer.

Female luer lock to luer lock transfer
Unique double thread transfer system, it allows fluid from one syringe luer lock to another syringe luer lock or any luer lock device

60cc Male & Female Transfers

\$50.00 ea.

Female to Female Luer Transfer
